SUMMARY

Senior Frontend Engineer with over 7 years of experience, including 1 year in technical leadership and 4 years as a Fullstack developer. Expert in building high-performance web applications using React.js, TypeScript, and the Next.js ecosystem. Proven track record in architecting scalable management systems and integrating AI-driven solutions to optimize development workflows. Passionate about delivering robust, user-centric products that drive business growth through modern technology and efficient system design.

EDUCATION

Ho Chi Minh City Institute of Applied Science and Technology (HIAST)	2012 – 2015
College Degree in Information Technology	GPA: 3.1/4.0

SKILLS

Programming	JavaScript (ES6+), TypeScript, PHP
Frontend Stack	React, Next.js, React Query, Tailwind CSS, Ant Design
Backend & Database	Node.js, Express.js, Laravel, PostgreSQL, MongoDB
DevOps & Tools	Git, Docker, Linux, CI/CD basics
Testing	Jest, React Testing Library

WORK EXPERIENCE

GATLAS CO., LTD	June 2025 – Nov 2025
Senior Frontend Developer	

Project: Build Landing Page and Financial Product (ReactJS, AI Prompting)

- Developed AI-integrated financial products and landing pages, improving user engagement.
- Researched and integrated new AI tools to automate workflow and increase development efficiency.
- Authored and fine-tuned prompts to rapidly build and iterate MVP products.

WAREFLEX SEA COMPANY LIMITED	May 2023 – June 2025
Senior Frontend Developer / Technical Lead Frontend	

- **Project: OMS, WMS, TMS, Marketplace** (NextJS, ElectronJS, NestJS, Ant Design, Sentry)
- Lead the Frontend team in building core UI components and system architecture for large-scale logistics platforms.
- Optimized mono-repo source code, reducing total bundle size by 30% and enhancing overall performance.
- Developed a specialized desktop application using ElectronJS for integration with RFID printers and WMS.
- Integrated an AI-driven Chatbot into the management platform to automate customer support and streamline internal inquiries.
- Collaborated with cross-functional departments to refine requirements and ensure system scalability.
- Mentored team members and implemented Jest/Sentry to maintain high system stability.

NEO PAYMENT JSC

Apr 2022 – Mar 2023

Senior Frontend Developer

- **Project: Merchant Portal & NeoX Portal** (ReactJS, Ant Design, UmiJS, DvaJS)
- Developed and maintained portal websites for merchants and internal operators, ensuring high-performance payment management.
- Engineered reusable UI components using UmiJS and Ant Design to standardize the Frontend architecture.
- Improved code quality and resolved system vulnerabilities identified by SonarQube; implemented Unit Tests to ensure stability.

BOO TRADING JSC

May 2020 – Feb 2021

Fullstack Developer

- **Project: BOO Marketplace Website** (PHP Laravel, VueJS, MySQL, Redis, RabbitMQ, Jenkins)
- Built an e-commerce platform for clothing and accessories, focusing on high-traffic marketplace and admin dashboard.
- Developed robust APIs to synchronize real-time data with third-party ERP systems.
- Optimized system performance by implementing Redis caching and RabbitMQ for asynchronous operations.
- Established CI/CD pipelines using Jenkins for automated build, deployment, and testing.

AI PACIFIC

Jan 2018 – May 2020

Fullstack Web Developer

- **Projects: HR Management System & Hospital Information System** (ReactJS, ReactNative, PHP, MySQL, Redis, Socket.IO)
- Designed and implemented core UI components for internal management applications and mobile applications.
- Developed real-time APIs using SailsJS and optimized data export requests for large client datasets.
- Maintained system integrity and provided technical support for complex healthcare and HR modules.

VNETWORK JSC

May 2015 – Dec 2017

Junior Web Developer

- **Core Stack:** PHP, jQuery, Twitter Bootstrap, WordPress.
- Converted PSD designs into pixel-perfect HTML/CSS and developed custom WordPress features based on client requirements.
- Maintained and upgraded company websites (vnetwork.vn, vncdn.vn), ensuring cross-browser compatibility and SEO optimization.
