SUMMARY

Frontend Engineer with 6 years of experience, including 1 year of leadership. Specialized in the React/Next.js ecosystem, with hands-on experience designing and delivering management systems, complex dashboards, marketplace and payment platforms built on Micro-frontends and modern architectures, combined with high-performance, security, interactive business UIs and smooth animations.

SKILLS

Programming Languages	TypeScript, JavaScript
Frameworks & Libraries	ReactJS, NextJS, React Native, ElectronJS, VueJS, Tailwind CSS, Ant Design, React Query, Jest
Tools & Others	Git, Docker, CI/CD, Sentry
English	Basic Communication

WORK EXPERIENCE

GATLAS CO. LTD

June 2025 – Nov 2025

Senior Frontend Developer

Project: AI-Driven Financial Products — **Team size:** 4

Technical Stack: ReactJS, Node.js, Tailwind CSS, AI Prompting

- Developed AI-integrated financial products and landing pages to improve user engagement.
- Research and integration of new AI tools to automate internal workflows and increase development speed.
- Created and fine-tuned specialized prompts to rapidly build and iterate products.

WAREFLEX SEA COMPANY LIMITED

May 2023 – June 2025

Senior Frontend Developer / Technical Lead Frontend

Project: Logistics Ecosystem (OMS, WMS, TMS, Marketplace) — **Team size:** 12

Technical Stack: NextJS, ElectronJS, NestJS, React Native, Zustand, Tailwind CSS, Turborepo, AWS, MongoDB

- Lead Frontend team in designing core UI components and system architecture for logistics ecosystem.
- Optimized source code and build pipelines, reducing bundle size and improving system performance.
- Developed a desktop application using ElectronJS for hardware integration with RFID printer.
- Developed UI components for chatbot AI.
- Implemented an AI-driven Chatbot to automate customer support and streamline internal inquiries.
- Developed transportation and warehouse applications using React Native to ensure cross-platform consistency.
- Collaborated with cross-functional departments to refine requirements and ensure system scalability.
- Reviewed code and provided mentorship to junior developers.
- Implemented Jest/Sentry to maintain high system stability.

NEO PAYMENT JSC

Apr 2022 – Mar 2023

Senior Frontend Developer

Project: Payment products — **Team size:** 20

Technical Stack: ReactJS, Ant Design, UmiJS, DvaJS, NodeJS, MongoDB

- Developed payment portals and dashboards for merchants and operators for efficient payment management.

- Created reusable UI components to standardize the Frontend architecture.
- Developed KYC features to streamline user verification processes and enhance security.
- Joined sprint planning and collaborated with cross-functional teams to ensure timely delivery of features.
- Improved code quality, security and resolved system vulnerabilities identified by SonarQube.

BOO TRADING JSC

May 2020 – Feb 2021

Fullstack Developer

Project: E-commerce Marketplace — **Team size:** 3

Technical Stack: Laravel, NuxtJS, MySQL, Redis, RabbitMQ, Jenkins

- Built an e-commerce platform for clothing, focusing on high-traffic marketplaces.
- Developed robust APIs to synchronize real-time inventory and sales data with third-party ERP systems.
- Improved system performance by implementing Redis caching and RabbitMQ for asynchronous tasks.
- Established CI/CD pipelines using Jenkins for automated build, testing, and deployment.
- Mentored team members.

AI PACIFIC

Jan 2018 – May 2020

Fullstack Developer

Projects: HRMS & Hospital Information Systems — **Team size:** 15

Technical Stack: ReactJS, React Native, Angular, PHP, MySQL, ASP.NET, NodeJS, Redis

- Developed core UI components and business logic for internal management and mobile healthcare applications.
- Implemented micro-frontend using module federation.
- Built RESTful APIs for HRMS and Hospital Information Systems using NodeJS.
- Built real-time APIs using NodeJS and SocketIO and optimized data processing for large healthcare datasets.
- Built high availability and scalable systems to handle large datasets and concurrent users.
- Processed excel data and integrated it into the system for HRMS and Hospital Information Systems.
- Used ASP.NET and Angular to build hospital management systems for other clients.

VNETWORK JSC

May 2015 – Dec 2017

Junior Web Developer

Projects: WHMCS & Outsourcing — **Team size:** 4

Technical Stack: PHP, jQuery, Bootstrap, WordPress

- Converted PSD designs into responsive web interfaces and developed custom WordPress features.
- Maintained and optimized company websites, ensuring cross-browser compatibility and SEO.
- Maintained WHMCS-based web hosting management systems.
- Outsourcing projects for clients, including e-commerce and corporate websites.

EDUCATION

Ho Chi Minh City Institute of Applied Science and Technology (HIAST)

2012 – 2015

College Degree in Information Technology
