SUMMARY

Software Engineer with 10 years of experience in software development, featuring 6 years of specialization in Frontend and 4 years as a Fullstack Engineer. Expert in the React and Next.js ecosystem, with a proven track record in designing scalable enterprise systems (OMS, WMS, TMS, ...) and implementing AI-driven development workflows. Skilled at bridging the gap between complex technical requirements and high-performance, user-centric products. Adept at leading cross-functional teams and building robust, scalable architectures that support business growth.

SKILLS

Programming	TypeScript, JavaScript, PHP
Frameworks & Libraries	React, Next.js, React Native, Express, Laravel, ElectronJS, Tailwind CSS, Ant Design, React Query
Tools & Others	Git, Docker, CI/CD, Sentry, Redis, PostgreSQL, MongoDB, Jest
English	Basic Communication

WORK EXPERIENCE

GATLAS CO., LTD

June 2025 – Nov 2025

Senior Frontend Developer

Project: AI-Driven Financial Products (ReactJS, AI Prompting)

- Developed AI-integrated financial products and landing pages to improve user engagement.
- Led the research and integration of new AI tools to automate internal workflows and increase development speed.
- Created and fine-tuned specialized prompts to rapidly build and iterate MVP products.

WAREFLEX SEA COMPANY LIMITED

May 2023 – June 2025

Senior Frontend Developer / Technical Lead Frontend

- **Project: Logistics Ecosystem (OMS, WMS, TMS, Marketplace)** (NextJS, ElectronJS, NestJS, React Native)
- Led the Frontend team in designing core UI components and system architecture for large-scale logistics platforms.
- Optimized source code and build pipelines, reducing bundle size and improving system performance.
- Developed a desktop application using ElectronJS for hardware integration with RFID printers and WMS.
- Implemented an AI-driven Chatbot to automate customer support and streamline internal inquiries.
- Collaborated with cross-functional departments to refine requirements and ensure system scalability.
- Mentored team members and implemented Jest/Sentry to maintain high system stability.

NEO PAYMENT JSC

Apr 2022 – Mar 2023

Senior Frontend Developer

- **Project: Fintech Portals** (ReactJS, Ant Design, UmiJS, DvaJS)
- Developed high-performance portal websites for merchants and operators for efficient payment management.

- Created reusable UI components using UmiJS and Ant Design to standardize the Frontend architecture.
- Improved code quality and resolved system vulnerabilities identified by SonarQube; implemented Unit Tests.

BOO TRADING JSC

May 2020 – Feb 2021

Fullstack Developer

- **Project: E-commerce Marketplace** (*PHP Laravel, VueJS, MySQL, Redis, RabbitMQ*)
- Built an e-commerce platform for clothing, focusing on high-traffic marketplaces and admin dashboards.
- Developed robust APIs to synchronize real-time inventory and sales data with third-party ERP systems.
- Improved system performance by implementing Redis caching and RabbitMQ for asynchronous tasks.
- Established CI/CD pipelines using Jenkins for automated build, testing, and deployment.

AI PACIFIC

Jan 2018 – May 2020

Fullstack Web Developer

- **Projects: HRMS & Hospital Information Systems** (*ReactJS, ReactNative, PHP, MySQL*)
- Developed core UI components and business logic for internal management and mobile healthcare applications.
- Built real-time APIs using SailsJS and optimized data processing for large healthcare datasets.
- Maintained system integrity and provided technical support for complex healthcare and HR modules.

VNETWORK JSC

May 2015 – Dec 2017

Junior Web Developer

- **Stack:** PHP, jQuery, Bootstrap, WordPress.
- Converted PSD designs into responsive web interfaces and developed custom WordPress features.
- Maintained and optimized company websites, ensuring cross-browser compatibility and SEO.

EDUCATION

Ho Chi Minh City Institute of Applied Science and Technology (HIAST)

2012 – 2015

College Degree in Information Technology
